

# Lake Wildlife Survey

Can you spot any of these on the lake today? Count how many of each kind you see?

# Observations

**Which of the birds dive completely underwater for food and which just put their head in?**

Divers: \_\_\_\_\_

Dippers: \_\_\_\_\_

**Which birds enjoy resting on the island at the end of the pond?**

\_\_\_\_\_

**Which are making the most noise today?**

\_\_\_\_\_

**Dragonflies come in different colours. What colour did you see?**

\_\_\_\_\_

**Kingfishers may be brightly coloured but they are difficult to spot. So if you managed to see one. High Five!** 

## Did you know?

**Bread is bad for ducks and other waterfowl. Their natural diet is things like pond weed, seeds, insects, worms, small water snails and amphibians, and even crustaceans, such as crayfish. Bread doesn't have the important vitamins and nutrients that they need, it just fills them up and discourages them from finding food which is good for them.**
